Summary

Results-driven Senior Software Engineer with extensive experience in designing and deploying cloud-native Java microservices. Proven track record in building high-throughput distributed systems and integrating with healthcare IT solutions. Passionate about leveraging AI tools to enhance development workflows and ensure code quality.

Experience

Senior Software Engineer ? ABC Company

2025-07-14 ? Present

? - Design, build, and maintain scalable backend/frontend systems, taking ownership of features from technical design through deployment and production monitoring. - Mentor junior and mid-level engineers through code reviews, pairing, and technical guidance, while raising the team's overall engineering standards. - Collaborate with product, design, and cross-functional stakeholders to translate business requirements into robust, well-architected technical solutions.

? - Design, build, and deploy high-quality Java microservices that power real-time clinical workflows, ensuring scalability and fault tolerance.

? - Review code and mentor junior engineers, contributing to architecture decisions and ensuring adherence to secure coding practices.

? - Collaborate with product managers and clinical informaticists to ship integrated solutions, focusing on quality and observability.
